## **Post "HLS" Liaisons Advisory Council**

VFW Post 8337 coordinates community outreach programs through a network of veterans embedded in both public and private sectors of the US economy. Embedded veterans from all branches and eras provide a point of contact for event and contingency planners, advice and support during operations, and a pre-authorized liaison for Incident Commanders when forming "Unified" commands during a large scale community crisis such as a terrorist attack, natural or man-made disaster, or pandemic.

*Developing a network of Post' liaisons allows us to pre-position veterans behind the lines and train them to be mission-ready to conduct risk and damage assessments, submit incident reports, and offer advice to our Homeland Security Advisory Council during the next terrorist attack, natural or man-made disaster, Pandemic, or large scale community crisis. Post' Liaisons, like*

*on-site Credit Union and Bank Risk Managers, automatically become part of a “Private Sector Unified Command during a crisis or when a community finds itself in harms-way.*

*It's critically important that liaison' contact information to include picture and physical descriptions are kept current. This will help speed our first response and enhance security at our Emergency Operation Center (EOC), and staging areas. \* Note: When clearing personnel into the EOC use both facial shots and pictures standing next to a vehicle mirror, chair, etc to judge height, weight, and other physical characteristics. If in doubt don't allow them into the Emergency Operations Center, Staging or restricted areas. Pictures on file should include a head shot, picture of the individual standing next to a height chart or next to someone you recognize and can use as a comparison.*

Following is a log of liaisons considered part of VFW Post 8337 Homeland Security R&D project conducted between 9-11-02 and 9-11-07.
